

We are architects, engineers, interior designers, and master planners with a synchronized interplay. One Project. One Team. One Voice.

Collaborating together, strengthening each other that's what we call Design Synchronicity.

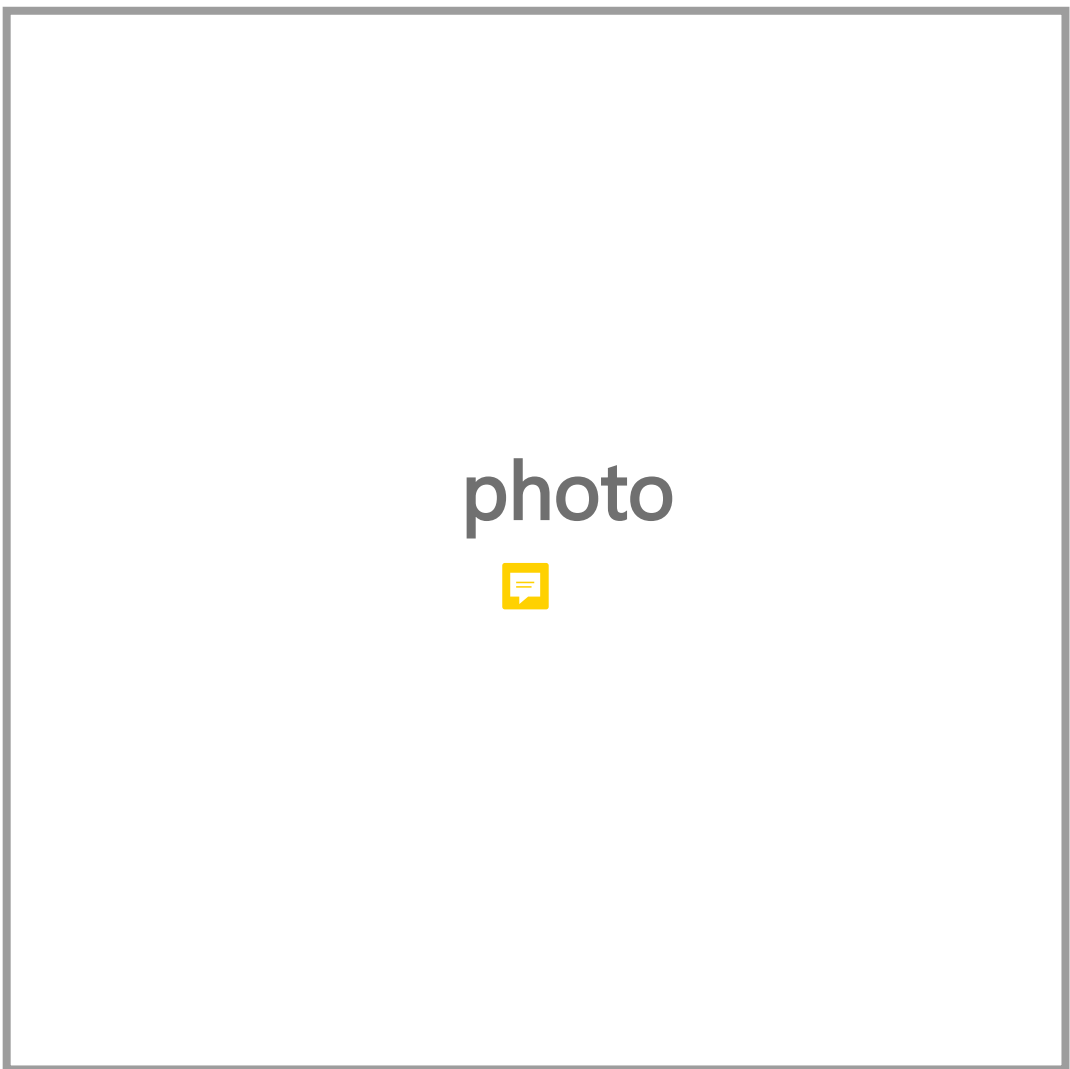

We value DISCOVERY, we engage in INNOVATION and we INSPIRE excellence in design. We are Strang.

Established in 1935, Strang is an award-winning integrated architecture, engineering, interior design and planning firm. Our inclusive project approach allows us to provide exceptional design for projects within the science and technology, commercial, higher education, and civic + cultural sectors.

Vision: Impact the world and empower people to achieve their highest potential through our philosophy of Design Synchronicity.

Mission: We create innovative and welcoming built environments that curate experiences, engage communities, and inspire.

Community and civic buildings serve their citizens as the heart of their neighborhoods, towns, and cities. We understand these buildings must be designed to reflect the perspective of their community. For that reason, Strang buildings create experiences, foster understanding, and initiate engagement.

Strang's portfolio is rich in unique Municipal buildings encompassing everything from offices, libraries, municipal buildings, business centers, and community gathering spaces.

Exterior Restoration

History of a City

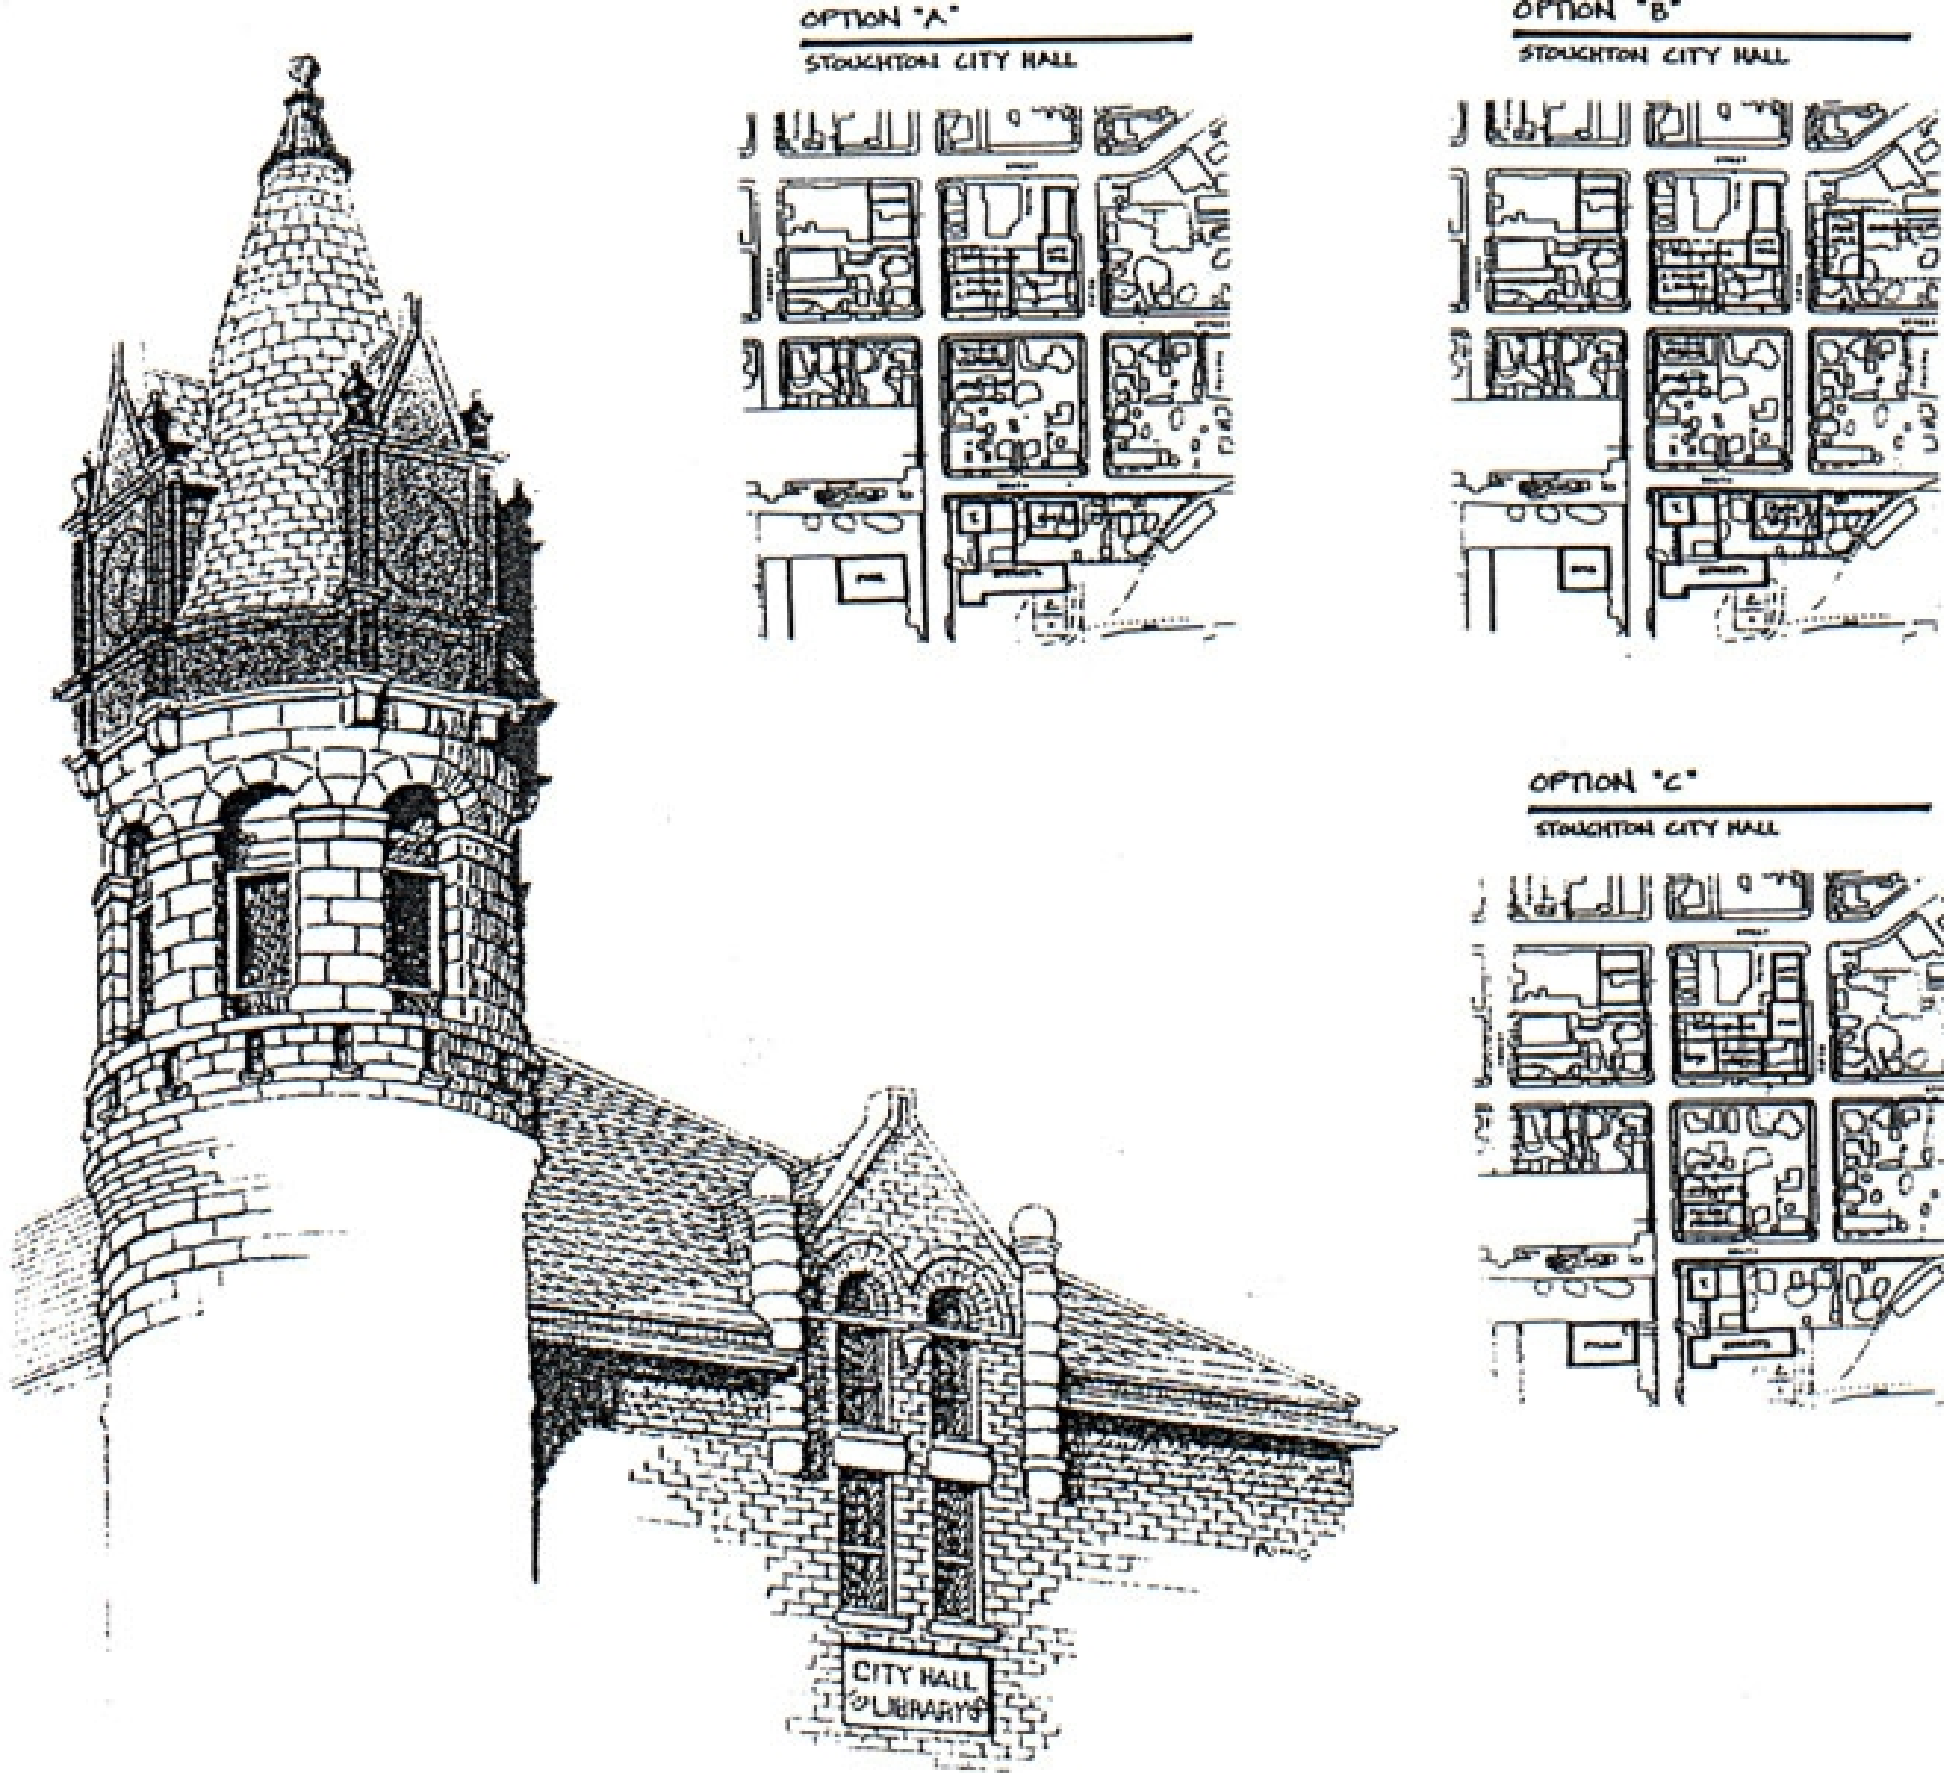

Main Challenge:

Solution:

"We loved working with Strang!"
-Stoughton City Facilities Manager

Phase one involved the 53,000 square foot remodeling of an historic 1900 Romanesque city hall, as well as the public safety and municipal utilities building. We added an elevator shaft on the exterior of the building, and also reviewed and addressed current and future parking needs. A detailed construction schedule provided smooth relocation of city departments without interruption of services. A complete, two-step exterior masonry restoration of the historic city hall structure included cleaning, repair and tuck pointing of brick masonry and stone.

Interesting Headline:

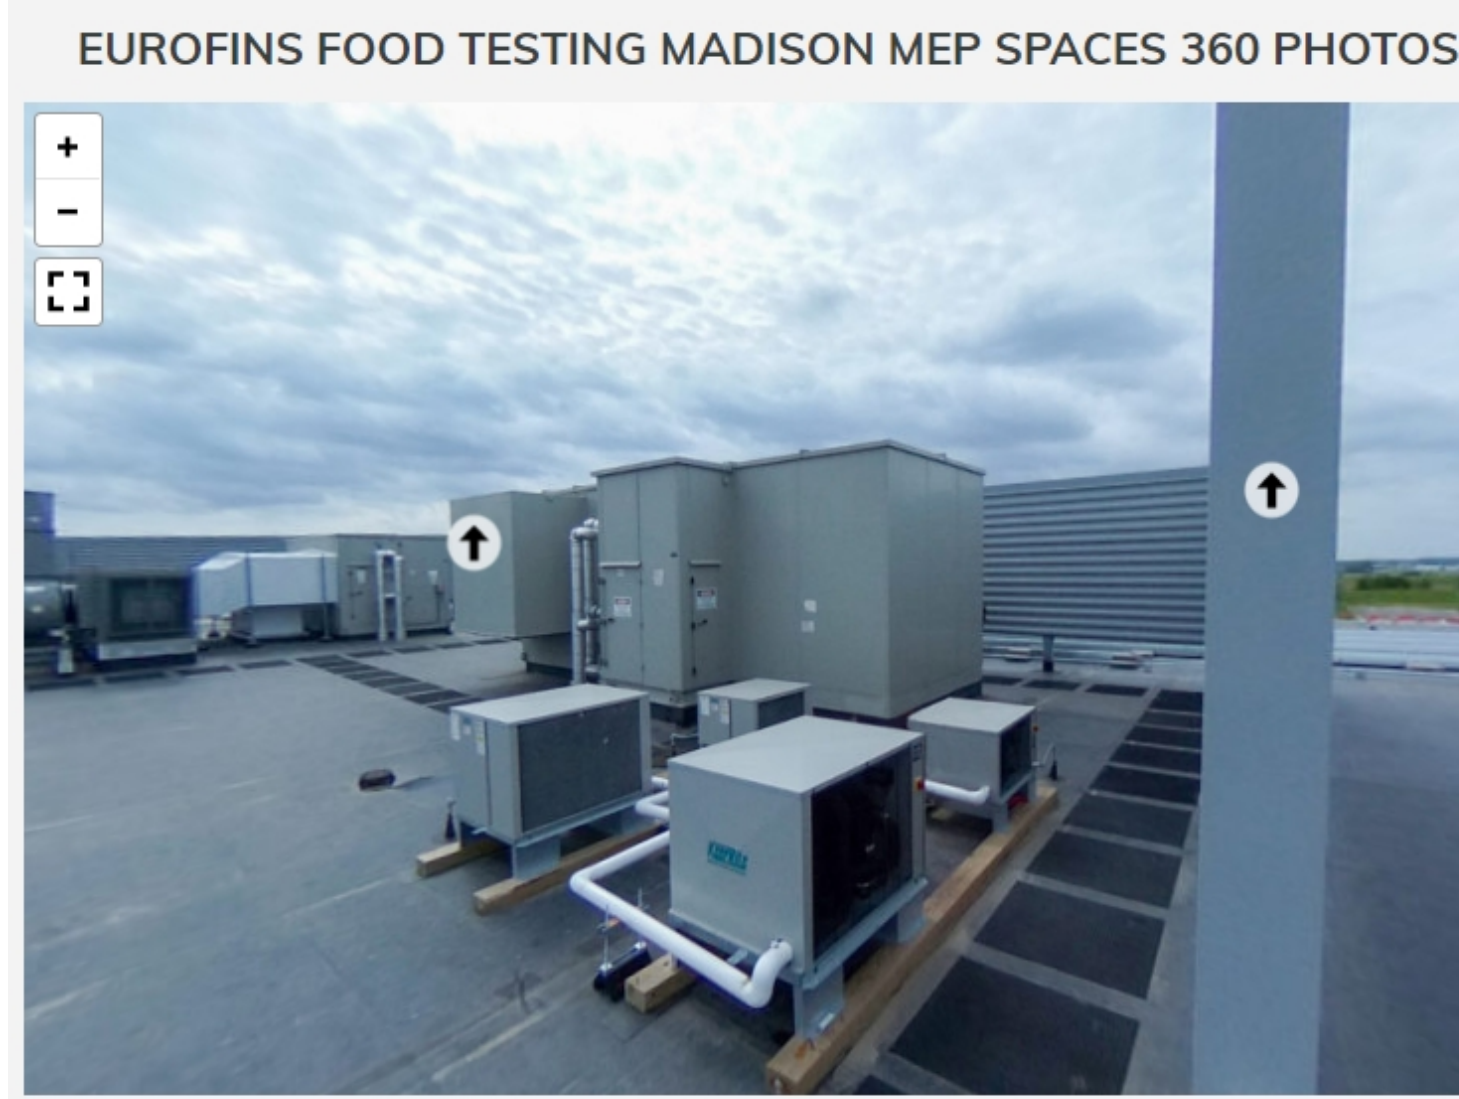

Main Challenge:

Solution:

"I would absolutely recommend working with Strang"

- Brent Rozema, Eurofins Food Testing

The project utilized high-performance, desiccant dehumidification and steam humidification systems for critical environmental controls. Premium efficiency, air-cooled chillers allowed for high performance lab cooling. Air-side energy recovery was applied where code-required, and expanded where appropriate. The project evaluated the cost/benefit of variable volume fume exhaust systems and ductless fume hoods, with a final determination that VAV fume exhaust would result in favorable financial payback and energy savings, with certain favorable applications for ductless systems. Air-side economizers were designed for spaces with significant cooling demands throughout the year.

Larry Barton, AIA, LEED AP ID+C, WELL AP President | CEO

Larry has more than 35 years of expert experience in a variety of master planning, including educational, offices, communities and space needs. His background includes master planning studies, extensive renovations, additions and new building design. A passionate proponent of LEED/ sustainable building practices, Larry is equally passionate about WELL Building standards, including it in our new 2018 Strang workplace. His leadership has guided many of Strang’s most complex projects and he looks forward to assisting with this project.
